Centre for Value Education

"The aim of education is the knowledge, not of facts but of values"-William Ralph

Vision:

Promoting Value education for achieving "Excellence by Education" among student community

Mission:

The purpose of life is to live in moral excellence. Increase in Cynicism (inclination to believe that people are motivated purely by self-interest) philosophy in the society brought to focus the need for readjustments in education system and thereby for making the education a forceful tool for the cultivation of social and moral values.

Therefore, besides class room training, an educated professional must also establish a decent relationship among the people with whom he/she socially interact and communicate in daily life. The Centre for Value Education at NIT Warangal works in this direction with the following mission:

- (i) Promoting Intellectual morals among the student fraternity**
- (ii) Emotional control and ethical practices**
- (iii) Interfacing spirituality with education for moral excellence.**

The result of this kind of education will develop **accountable sincerity** (not pretended), **honesty, cheerfulness, freedom from egoism**, and **equanimity in joy/ suffering, gratitude** in the future professional citizens.

"The growing concern over the erosion of essential values and readjustments in the curriculum in order to make education a forceful tool for the cultivation of social and moral values." --National Education Policy (NPE), 1986.

The following Events are planned for the Academic Year 2018-19 for executing the Mission.
